

NE593 GitHub Repository Rubric

Criterion	Performance descriptors / score ranges	Points	Score
1. Repository completeness and required content	18-20: Includes all required deliverables and clearly reflects the project's full scope. 14-17: Mostly complete; minor required elements are missing or underdeveloped. 10-13: Partially complete; several expected materials are missing, thin, or unclear. 0-9: Major components are missing, incomplete, or hard to locate.	20	_____
2. Organization and repository structure	14-15: Repository is easy to navigate, logically organized, and well structured. 11-13: Mostly organized; a few files or folders are awkwardly arranged or labeled. 8-10: Organization is uneven; structure slows understanding or navigation. 0-7: Repository is disorganized or difficult to follow.	15	_____
3. Computational implementation	23-25: Computational work is substantial, technically sound, and well matched to the project goals. 18-22: Solid implementation with moderate depth or minor limitations. 13-17: Some meaningful implementation is present, but scope or clarity is limited. 0-12: Minimal, weak, or largely incomplete computational implementation.	25	_____
4. Reproducibility and ease of running	23-25: Clear instructions; code runs reproducibly; results and figures are generated clearly and reliably. 18-22: Mostly reproducible; instructions or execution are good but could be smoother or more complete. 13-17: Reproducibility is partial; some results, figures, or steps are difficult to regenerate. 0-12: Hard to run, poorly documented, or results/figures are not reproducible.	25	_____
5. Code quality and programming habits	14-15: Code is readable, commented where needed, stylistically consistent, and reflects strong programming habits. 11-13: Generally solid code quality with some areas for improvement in style, comments, or consistency. 8-10: Code works in places but readability, commenting, naming, or style are inconsistent. 0-7: Code quality substantially limits interpretation, reuse, or evaluation.	15	_____
