

NE593 Oral Presentation Rubric (100 points)

20-minute team presentation followed by questions

Criterion	Performance bands	Score
1. Project framing and motivation 15 points	13–15: Clear introduction and motivation; audience quickly understands the question and why it matters. 10–12: Mostly clear, but framing or motivation could be sharper. 7–9: Basic topic present, but purpose is vague or underdeveloped. 0–6: Unclear focus or weak/no motivation.	____ / 15
2. Technical understanding and accuracy 20 points	18–20: Accurate, precise, course-appropriate explanation; team shows real understanding. 14–17: Generally accurate, with minor gaps or imprecision. 10–13: Partial understanding; some concepts oversimplified or confused. 0–9: Major misunderstandings or inaccuracies.	____ / 20
3. Computational component / implementation 20 points	18–20: Computational work is substantial, clearly explained, and well matched to project goals. 14–17: Solid implementation, though explanation or ambition is somewhat limited. 10–13: Some implementation is present, but it is minimal, unclear, or loosely connected to the main question. 0–9: Little to no meaningful computational component.	____ / 20
4. Results, analysis, and insight 20 points	18–20: Results are clear, well analyzed, and thoughtfully interpreted; limitations/open questions acknowledged. 14–17: Results are presented and interpreted reasonably well, with moderate depth. 10–13: Results are shown, but interpretation is thin or mostly descriptive. 0–9: Results are missing, unclear, or not meaningfully interpreted.	____ / 20
5. Organization and narrative flow 10 points	9–10: Excellent flow; transitions are smooth; talk builds a coherent story. 7–8: Mostly well organized, with minor rough spots. 5–6: Organization is uneven; audience must work to follow the logic. 0–4: Disorganized or difficult to follow.	____ / 10
6. Slide quality and visual communication 10 points	9–10: Slides are clean, readable, and visually effective; figures/tables/equations support understanding. 7–8: Slides are generally good, with a few crowded or unclear elements. 5–6: Slides are text-heavy, visually inconsistent, or not well integrated with the talk. 0–4: Poor readability or ineffective visuals substantially hurt the presentation.	____ / 10
7. Delivery, timing, and team balance 10 points	9–10: Clear delivery, good pacing, stays within time, and contributions are well balanced across team members. 7–8: Good delivery overall, but pacing, clarity, or balance could improve. 5–6: Uneven delivery, noticeable timing issues, or one person dominates. 0–4: Hard to hear/follow, poor pacing, major timing problems, or minimal team balance.	____ / 10
8. Response to questions 5 points	5: Answers are clear, accurate, and thoughtful. 4: Answers are mostly solid, with minor hesitation. 2–3: Partial answers; some uncertainty about core points. 0–1: Unable to answer basic questions about the project.	____ / 5
